The schedule of the School week is designed for focusing on two themes/streams. At the time of Registration students can choose two out of a total of four themes/streams: phonology, lexicon, morphosyntax, and environment.

On each day, the morning slots are reserved for viewing the two pre-recorded lectures of your first and second choice stream to prepare for the accompanying live discussions in the afternoon. However, everyone is welcome to attend the discussions for more than two themes, by watching the extra lectures ahead of time. In this case, please indicate the other themes you are interested in attending during the registration, in the 3rd and 4th choice fields.

In case you are curious about the themes you will not attend, we will provide a list of one lecture and discussion per theme as our recommendation (taster).

**Note that the discussions & practicals repeat live three times each day in three different time zones. The discussion leaders and assistants in each time zone are introduced in the tables below.**
